WELCOME TO THE 1ST ISSUE OF VLADIMIR'S FOREX EDUCATION FOR BEGINNERS

Hi (firstname_fix),

My name is Vladimir Ribakov and I'd like to personally welcome you to my Forex community. Within 14 days, using this newsletter, if you watch my short daily videos carefully, you are going to embark on a **successful and profitable trading career**.

As a beginner in the Forex niche you are probably swamped with endless information from various people who all claim to be expert traders. If you Google for the word Forex you will see countless results that suggest different methods, strategies and systems.

BUT, sometimes less is more.

The #1 mistake you want to avoid is reading/ watching/ following too much information and trying to implement everything at once. In this newsletter I am going to provide you with **all the vital information and tools** you need to start **making consistent money from trading**.

I will cover all the basics such as using Metatrader4 platform, indicators, common mistakes and the best trading methods. You will also get some invaluable gifts that will instantly elevate you to a different level of expertise.

I know videos are much more popular these days than long reading, so that's why I've invested a lot of time to create a newsletter in a format of short video lessons that will be interesting and won't take much of your time

A final word about our support: we are proud to provide the best support in the industry which includes our advisers by email, chat and phone. Also, I'm available for direct communication via my **Traders Academy Club live trading room** and on my social network. And you are welcome to follow me on my blog and on my social media.
